Summary

PL/SQL Developer with 3 years of experience in Oracle database development, specializing in writing optimized SQL/PL-SQL code, performance tuning, and production support. Proven ability to design and maintain PL/SQL packages, procedures, and database objects for enterprise applications. Experienced in troubleshooting production issues, ensuring high availability, and delivering scalable data solutions.

Experience

Tech Mahindra

Sept 2023 – Present

- Developed and maintained PL/SQL packages, procedures, functions, and triggers to implement business logic and data processing.
- Optimized complex SQL queries and PL/SQL code, reducing execution time by up to 35% through indexing and execution plan analysis.
- Performed query tuning and analyzed execution plans to improve database performance and scalability.
- Designed and maintained database objects including tables, indexes, and schemas to support enterprise applications.
- Built and managed ETL pipelines for data extraction, transformation, and integration across multiple systems.
- Provided production support by troubleshooting database issues, resolving performance bottlenecks, and ensuring system availability.
- Collaborated with cross-functional teams (BA, QA, Dev) to support testing phases including UAT and regression testing.
- Automated data workflows using Python and basic Unix shell scripting for data processing tasks.
- Used Git for version control and participated in development workflows aligned with CI/CD practices.

Projects

AI-Powered SQL Generator

- Developed an application that converts natural language into SQL queries using LLMs (Google Gemini API).
- Implemented SQL validation mechanisms to prevent execution of unsafe queries.
- Integrated query execution and visualization features using Streamlit and SQLite.

Skills

Programming: SQL, PL/SQL, Python

Databases: Oracle, MySQL, PostgreSQL, SQLite

Data Engineering: ETL Pipelines, Data Integration, Data Modeling

Performance: Query Optimization, Execution Plan Analysis, Indexing

Tools: Git, GitHub

Other: Unix/Linux Basics, Shell Scripting, SDLC, Debugging

Education

Bachelor of Technology – Computer Science
GIET University

2019 – 2023
CGPA: 8.23

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations
- Oracle Certified MySQL Administrator
- Microsoft Azure Fundamentals (AZ-900)
- AWS Certified Cloud Practitioner
