About

Backend Software Developer with 3 years of experience in telecom platforms, specializing in Oracle PL/SQL, Spring Boot microservices, and Kafka-based event-driven systems. Delivered high-volume automation handling 1000+ daily transactions with 99%+ accuracy, eliminating 1200+ manual operations per month. Hands-on experience with eSIM provisioning, CRM automation, and legacy modernization for subscriber systems supporting over 40 million users.

Education

GIET University, Odisha

Bachelor of Technology (Computer Science and Engineering)

Aug 2019 – May 2023

CGPA: 8.29 / 10.0

Skills

Languages:	PL/SQL, Python, JavaScript, SQL, Bash
Backend:	Spring Boot, Spring Kafka, Spring JDBC, Spring Cloud, Hibernate,
Databases:	Oracle (Advanced PL/SQL), PostgreSQL, MySQL, MongoDB
Architecture:	Microservices, Event-Driven Systems, Pub/Sub, Idempotent Consumers, Circuit Breakers
Tools:	Docker, Git, Maven, Jenkins, JUnit, Mockito, Postman, SQL Developer
Cloud & Monitoring:	AWS (EC2, S3, Lambda), SVN
Domain:	Telecom, eSIM, CRM (Vautive/Salvus), Legacy Migration, GSMA

Experience

Software Developer — Telefonica (O2) – Tech Mahindra, Pune

Sept 2023 – Present

- Designed a Kafka-based Legal Compliance Withdrawal System processing 1000+ daily requests across 6 brands serving 40M+ users, ensuring 100% regulatory compliance and eliminating manual ticket creation.
- Engineered PL/SQL multi-priority consumer identification logic using MSISDN normalization and complex joins, improving routing accuracy from 65% to 95%.
- Developed reusable Oracle TICKET_PKG adopted across 3 services, reducing duplicate code by 60% and improving delivery speed by 40%.
- Implemented Spring Boot Kafka consumers with DLQ, retry handling, offset management, and Prometheus metrics, sustaining a 99.8% success rate under peak traffic.
- Automated eSIM auto-cancellation through SOAP integration and order validation, saving more than 150 support hours per month.
- Redesigned customer invoice delivery workflows to match dynamic business requirements, engineering front-end components using HTML/CSS and structuring data handling via XML.
- Participated in UAT and supported production deployments and release activities.
- Provided production support, incident analysis, root cause investigation, and release validation activities.

Projects

AI-Powered SQL Generator — Python, Gemini API, Streamlit, SQLite

- Developed an application that converts natural language into SQL queries using LLMs (Google Gemini API).
- Applied prompt engineering techniques for generating optimized SQL queries.
- Implemented SQL validation mechanisms to prevent execution of unsafe queries.
- Integrated query execution and visualization using Streamlit and SQLite.
- Automated data workflows using Python and Unix shell scripting.
- Improved SQL generation efficiency and reduced manual effort by 50%.

Certifications

- AWS Certified Cloud Practitioner
- Cisco AI Technical Practitioner
- Microsoft Certified: Azure AI Fundamentals
- Standing Ovation Award – Tech Mahindra
